MESSAGE FROM OUR FOUNDER

In 2022 TechFIN received more media attention than at any point in its history. Spotlights through the John A Reisenbach Foundation's Dear New York television production, which aired multiple times on FOX, CBS, ABC and NBC, in addition to a piece produced by NY1's Lori Chung, raised the profile of TechFIN to new heights. The coverage has widened our pipeline of corporate hardware donors and monetary donors. TechFIN is proud to have deployed 901 computers to low-income families in the New York City metropolitan area in 2022, but we have the potential to deploy several thousand in a calendar year. With the help of our existing and future corporate hardware and financial supporters, we intend to make that happen.

The high cost of computer hardware is one of the key reasons the digital divide persists today. Computers should be as commonplace in the home as kitchen appliances. TechFIN believes that redirecting unwanted corporate PCs from the scrapheap into deserving homes is the most cost-effective way of accomplishing this at scale. TechFIN can procure a working computer for a deserving family at an all-inclusive cost of \$120 per computer.

We thank our monetary donors and the many corporations who have donated machines and partnered with us to reduce the e-waste from their upgrade cycles. Their efforts have directly benefited the lives of thousands simply by making the choice to allow their hardware to have a second life.

A handwritten signature in black ink, appearing to read 'Nigel Frankson', written in a cursive style.

NIGEL FRANKSON
Chairman, Co-founder

OUR STORY

TechFIN was founded in 2013 by Shadan Deleveaux and Nigel Frankson. It officially earned its 501(c)(3) designation in 2014. Both co-founders grew up in homes without computer hardware, and as a result, struggled to play catchup upon enrolling in college where all assignments are assigned, completed and submitted digitally. Both men subsequently entered the work force and quickly noticed they received new computers every two to three years, as corporations would rather prematurely upgrade a workstation than risk employee downtime due to malfunction. The stark juxtaposition between their resource restricted upbringing and their resource rich careers sparked the notion that there had to be some way to redirect these working computers from the scrap heap to the living room.

OUR MISSION

TechFIN aspires to help narrow the digital divide by addressing a major hurdle to computer hardware ownership: its cost. By collecting used PC based laptop and desktop computers, in bulk, from corporations, we are able to revitalize these machines and distribute them to low-income households at no cost to them. Our solution is sustainable, scalable and cost effective

COMMUNITY IMPACT AT A GLANCE

In 2022 TechFIN had its most productive year yet. Although we fell short of our goal of 1000 computers donated, due to the uneven nature of hardware availability, we are proud to have provided 901 families with a PC.

23 DEPLOYMENT EVENTS

In partnerships with Hispanic Star, NAACP, CIANA and other non-profits, TechFIN held multiple deployment events throughout New York City and Long Island.

901 COMPUTERS DONATED

TechFIN provided 901 refurbished desktop and laptop computers to deserving families. Our largest deployment was a 75 computers deployment to Long Island families, in partnership with Samuel Gonzales, Legislature for the 9th Legislative District.

2,250 PEOPLE

Though our primary focus is to close the digital divide among our youth, once these computers are in the home it provides the entire family access to our new digital world.

~16K LBS OF E-WASTE DIVERTED

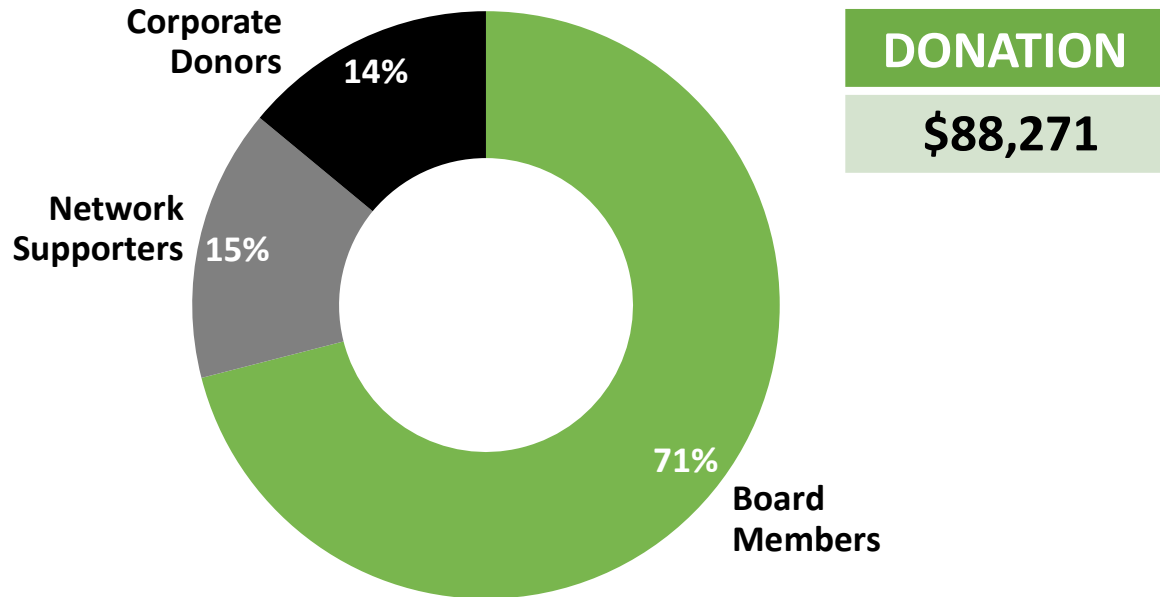

Thanks to our corporate donors TechFIN successfully divert over 16 thousand pounds of e-waste from landfill by simply choosing to give their hardware a second life.

TECHFIN IN THE NEWS

2022 FINANCIALS

THE FOLLOWING IS AN OVERVIEW OF TECH F.I.N.'S INCOME AND EXPENSES FOR THE CALENDAR YEAR ENDED DECEMBER 31, 2022:
